- Communications between computers and computer networks, Internet connections and local networks;

Education

Course of degree in systems and informatics engineering

9/1995 – 12/2003

University studies in computer science

10/2017 and 12/2017

Microsoft Business solutions professional certification, and

Microsoft business solutions certification:

Navision 4.0 C/Side introductions

Navision 4.0 C/ Side solution development

Work experience

5/2018 - Present

Java consultant, programmer and software developer

Your tasks/responsibilities

- Project with government public institutions using essentially JAVA EE technology.
- Project developer on Java Core and Java Swing desktop distributed application.
- Web Development (J2EE)
- Testing and production support and maintenance.

1/2018 – 4/2018

Java consultant, programmer and software developer

Your tasks/responsibilities

- Development on Java environment, working with IDEs as Netbeans and Eclipse. Using for development Microsoft Windows OS (Windows 10) or Linux Ubuntu (Ubuntu Desktop with almost command line work). As server environment, work with Linux Server (Ubuntu) and CentOS, some of them virtualized on VMWare or Oracle VirtualBox.
- Development on Java environment of Java Core applications, web applications using JSP's, as application server work with Apache Tomcat (JAR, WAR and EAR application deploy).
- Develop and architect database structures on PostgreSQL and MySQL. Use of MVC design patterns.
- Also, development of Java JAX-RS Restful Web Services, or in SOAP JAX-WS.0
- Use of ORM technology (Database Object Model, or in Java Core, or with Hibernate).

10/2013 – 11/2017

Software development specialist, project manager and system analyst, programmer

Your tasks/responsibilities

- POS (Point-of-Sales) developed in Visual Basic .NET optimized for touch screen. (used .NET framework 3.5 and EF1.0 (Entity Framework implementation of the logical data model with persistence)
- Ticket Card Validating software for mobile and fixed card validator (license, tax, fixed) developed in C/C++ using framework in C and framework Calypso (contactless cards SAM and others). □ Central server developed using MySql DB, Java, XML, AngularJS, JSON, Java RESTful services through the use of BPM methodology (Business Process Model) for business processes generation and BPMN notation 2.0.
- Service and communication «Middleware» integration solution / architecture. It provides communication of data info by messages between different devices and equipments, as the POS, ticket and card validators, Central System server, mobile Android (fiscalization and onboard ticket selling app) and other integrated services. Servers are built on Linux CentOS, and

CURRICULUM VITAE

integrator application server (message central) is built in JSON Java Restful services. All data is stored on MySQL databases.

2/2008 – 8/2013

Software Development Specialist, project manager and systems analyst, programmer

Your tasks/responsibilities

Development of Web projects (Websites) and databases (implementation of specific management software and vertical or using CMS like Joomla). Administration and management of the various companies of the group. Focus on specification and application development in PHP, Javascript and Ajax, with Mysql or Sql Server (as applications and use of cms), implementation of multimedia mobile applications with Adobe Flash and Adobe Air 3.0 to iOS and Android, as well as maintenance of older applications in ASP and Visual Basic 6. Management of all computer Park with about 30 posts and 4 of VPNs.

11/2005 – 2/2008

Software development specialist, systems analyst, programmer

Your tasks/responsibilities

Development of ERP projects using Microsoft Dynamics Navision platform, including implementation of a Human Resources module and payment of wages, and development of quality management module (digital Management of documentation, non-conformities, claims, etc...), other tasks (e.g. ERP implementation on the client, estimated costing mechanisms, information about competing products in CRM, etc.)

1/2005 – 11/2005

Computer consultant and programmer

Your tasks/responsibilities

Implementation of Web sites in ASP, Perl, Flash (MX 2004), for example, portal to a public institution that provides educational and support information for consultation on the courses taught in Portugal, as well as institutions (from primary school up to University and post-graduate, medium of access and prerequisites, etc...), Viewer application and document management and schemes developed in Java (backoffice with Swing GUI) and using Web Services to access the database (Postgresql) , etc...

5/2004 -12/2004

Systems analyst and software developer

Your tasks/responsibilities

Implementation of data bases project costing management of industrial production (implementation of a reusable platform independent data base), used MySQL databases and Sql Server2000, Enhydra development platform (Java Application Server with J2EE, XML, and Web integration servicesj) for implementation of the Protocol of 3 layers (layers, intermediate layer and the application layer or GUI) report tools (reporting) in Java (JasperReports and JFreeReports). Was used to the Java programming language,

including the Swing graphical Bookstore (development of graphical user interfaces)

4/2002 – 7/2003

Hardware technician and computer networks

Your tasks/responsibilities

Maintenance and management of computer Park), since all the equipment (computers, printers, and made repairs, and installations needed settings), as well as the internal network configuration, Internet access, etc.

4/2002 – 7/2013

Vocational trainer

Your tasks/responsibilities

Trainer in the area of new information technologies, having already taught more than 500 hours of training

4/2002 – 11/2003

Systems analyst and software developer

Your tasks/responsibilities

Implementation of a management information System with Databases and Web platforms (websites) in a vocational training institution and socio-cultural nature within the curricular internship course using Java (Swing), Oracle (database server and the respective development tools, Forms, and Reports), MS SQL Server 2000 and My SQL, using XML also, for example for structuring documents, etc. This project comprised the use of advanced SQL queries using recursion techniques and views.

12/2001 – 3/2002

Systems analyst, programmer, junior web consultant

Your tasks/responsibilities

Implementation of Web-Business solutions on Microsoft Windows 2000 Server environment and Professional, Microsoft SQL Server 2000, Visual Studio 6.0 and Microsoft Commerce Server 2000, a tool to implement websites using ASP, HTML, VBScript and JavaScript

8/2000

Hardware technician

Your tasks/responsibilities

Maintenance and installation of a computer network, whose platform consisted of Novell servers, Windows 2000 Professional and Windows 98 Second Edition

CURRICULUM VITAE

3/2000 – 6/2000

Programmer

Your tasks/responsibilities

Implementation of database systems, with Windows 95 OSR2 platform and SQL database, Oracle 8 and the package Developer 2000 tools (Forms, Reports, and Graphics). PL/SQL Language.
